Monday Dec: 28th

Fore part & middle part good fair winds. Up to 3 P.M made about 6 miles per hour. Steering W.N.W

Latitude 38°.38. Lon.
(B.T.N.P)

This is to testify that we. Lynus Plumer, John Hall Richard Cartha, Cornelius Burns, and William Herbert did on the night of the 25th of December last take the Ship Junior and that all others in the Ship are quite innocent of the deed.

The Captain and third mate were killed and the second mate was wounded and taken prisoner at the time. The mate was wounded with on the shoulder with the balls from a whaling gun and at the time we fired we set his bed on fire and he was obliged for fear of suffocation to take himself to the lower hole where he remain ~~ed~~ until Wednesday afternoon. We could not find him before that but we undertook a strict search and found him then. We promised his life and the ship if he would come out and surrender without any trouble and so he came out. Since he has been in the Ship he has been a good Officer and has kept his place. We agreed to leave him the greater part of the crew and we have put him under oath not to attempt to follow us; but to go straight away and not molest us. We shall watch around here for some time and if he attempts to follow us or stay around here we shall come around and sink the ship.

If we had not have found Mr. Nelson the ship would have been lost. We are taking two boats and ten men and every thing that we want. We did not put Mr Nelson in irons on account of his being wounded but we kept a strict guard over him all the time. We particularly wish to say that all others in the Ship but we five aforesaid men are quite innocent of any part in the affair.

Signed,

Witnesses Hugh Duff
Henry T. Lord
Herman Graf.

Lyrus Plumer
John Hall ×
Richard Cartha ×
Cornelius Burns ×
William Heibert

When I come up out of the lower hold (Dec 30. 1857) I found the Steward had cut his foot badly with one of the harpoons in the hands of Wm Heibert. Hugh Duff (the Steward) has been off duty ever since, on account of being wounded.

John Lewis one of the foremast hands, came to me on Dec 31 1857 and told me his was sick, his skin was all turning yellow and, the whites of his eyes were yellow. I was told it was Jaundice and was caused by fright

On the Evening of the ~~3 of Dec. 1857~~ 1st of January 1858 as Plumer was standing watch on me with pistol in hand. He confessed that he had taken two or three vessels before and that he came very near taking the Daniel Webster going home in 1856. & that he came out in this ship purpose to take her with Pistols & ammunition. He also said that he had no malice against any man in the ship only that he wanted to take the ship, & that he thought that could never be done until the captain & officers were killed

Friday December 25 1857

Shortened sail for the night, and everything appeared as usual until one O'clk Saturday morning, when the cabin was attacked by the five men aforesaid. Cyrus Plumer shot the Captain with a Whaling Gun containing 3 large balls. The balls went in at his left side passing under his ribs, and came out at his right side, entering the side of the ship. The Captain sprang from his bed, and exclaimed "Oh My God what is this." He was answered by Plummer. "God damn you it is me," who then seized the Captain by the hair of his head, (at the same time calling to his other men to "up with this hatchet,") and commenced cutting him with his hatchet, after he had struck him 3 or 4 times he let him fall on the floor and he (Plumer) went on deck. The Mate was also shot by a whaling gun in the hands of John Hall, alias William Payne, ~~He~~ was fired upon ~~at~~ the same time the Capt was. The charge from the gun went so close to ~~his~~ my left cheek as to take some of the skin off and lodged in ~~his~~ my left shoulder, it stunned ~~him~~ me so that ~~he~~ I knew nothing. But when ~~he~~ I came to ~~himself~~ myself. ~~He~~ I sprung from ~~his~~ my bed, exclaiming. "My God My God what is this." and called for some one to come to ~~him~~ me. ~~He~~ I said "Steward come here". The steward made haste to obey, but was met at the door by John Hall, with Cooper's Ax raised, (He had dropped his gun) and told him if he said a word he would ~~shot~~ kill him down. ~~The mate~~ I then sung out Boy, the boy turned out and came to me with a light. And I told him to put the fire out in my berth. Then I went into the second Mates room, and over the second mate dressing himself, I told him I was shot. He answered that he was shot too. The Third Mate was on the deck out of his berth dying. I left him and went to the captains state room, I was bare footed, not having taken time to dress my-self, When I entered the Captains state room I felt that I was bleeding inwardly. I sung out to the boy to bring a light here. When the boy brought the light I saw the Captain lying on deck dying. I raised up his head and he breathed his last. I then opened his chest and took his pistol (Revolver) and loaded 3 shots. I determined to shoot the ring leader. I then sent the boy to tell the second mate to come to me. But neither one returned. I then blowed the light out and stood there as long as I could without suffocation I then thought I'd leave and give them a chance to put the fire out. As I passed out through the Steerage I sung out Cooper

The cooper answered me here I am. Then I sung out for several
others, to see how many I'd have to help me. But when
I saw the ship on fire I thought was no use to ax
for help. I then sung out to the men to put the fire out, and
I would not hurt them, as I passed by I heard the sec-
-ond mate on deck asking for his life. I heard Plummer
say kill him (as I thought). When the men heard me sing out to
put the fire out. They said "Yes you would like to get us down
there". I told me to "come up you son of a Bitch or I'll shoot you
I felt faint. and being wounded I thought I'd take a Bring
Borer and go down in the lower hold and get some wa-
-ter also in hopes of shooting the Ring Leader. But I was two days
without geting water or anything to eat. By that time my
bister was out of order. My thoughts were all the time that
the second mate was dead. My only hopes now that I would
live to get into port. and if they undertook to sell the
ship I would come out and take her. But after I had
been in the hold five days they found me and told
me if I would come out that I should not be h-
-urt and that I might have the ship. So I passed my bis-
-ter up when I found to my surprise the Second Mate alive &
in irons. I was almost dead. But they took me aft and wa-
-shed and dressed my shoulder where I was shot. had mor-
-tified. but they had it dressed. They told me that all they
wanted me to do was to take them when they want-
-ed to go. and I might have the ship. So I did it to
save my life & the ship. The third Mate had the boarding knife
run through him several times. ~~and~~ by Cornelius Burns. and after he
had killed him. Richard Martha told him to get out of the way
And he (Martha) struck at the second mate with another boarding
knife. But it struck the Berth Board. He then struck at him ag-
-ain when the 2nd Mate caught the blade in his hand and bent
the point of it on the berth board. By that time I was out of
my berth. hollowing. Martha then fired a pocket pistol at
the 2nd Mate. and shot him in the breast. All I know befor-
-e I took to the hold was that the Captain & 3rd Mate were
dead. & that the 2nd Mate was shot and wounded. and I suppose
he was killed after he went on deck. The remainder of the
aforesaid testimony was told me after I was taken.

The Proceedings on Deck as I was told.

~~At one o'clk~~ Between one & two o'clk Saturday morning I (with the other foremast hands not engaged in the mutiny) was awakened from a sound sleep and was told by one of the gang the ship was taken. & that the Captain. 2nd & 3rd Mates were dead and that the first Mate had stowed himself away. We were then made come on deck and were made arm ourselves with Sabres, Harpoons, Spades, Axes & other things & were made stand at the Fore, main & Mizzen Hatchways, watching for the mate. Just after I came on deck and had got to the try-Works the Second Mate came on deck and was made prisoner by the Gang. Plumer then bound him and sent him to the "fore castle" & set a strict watch over him. All hands except 2 at each hatch were made come aft, and work at putting out the fire. After we had worked very hard for an hour or so, we got the fire so mutch subsided that we could venture below. A couple of men were then sent below into the cabin and bent a rope on the Captains ankle, and some of the men, on deck hauled him up. A heavy chain was then made fast to him and he was thrown overboard, on the larboard quarter. Two men were then sent below and bent a rope on to the third mate's leg and he was drawn on deck and the Grind Stone was then made fast to him and he was thrown overboard on the Larboard Quarter. After the fire was put out. Plumer ordered the ship to head W. N. W. Thinking we was steering for Cape Horn Australia. but instead of heading for Cape Horn, he was heading a strait course for Lord Howes Islands. After I was found I was told to steer for Cape Horn Australia, & accordingly changed my course to S. W. by S. We made the land on Sunday January 3rd 1858. The same Morning, (Saturday 26) the hands were made come on deck and throw the boat Cask, the Spades, Spare Irons, & in fact every-thing pertaining to whaling overboard. Then they broke out the slops in the ship, & all the stores, and appropriated them to their own use. And have cast of Rye & other things overboard. After that, they went below in the Cabin and broke out everything they could find. Liquors, Sugar & everything else they could ~~find~~ lay their hands on. All the stores used in fact everything in the ship require for a whaling voyage are used or destroyed. excepting Bread water, the clothing and the Articles on board to repair ship were distroyed.

My proceedings in the Hold from Dec 25 to Dec 30. 1851

After telling the men to put out the fire. (which was the last words I said) I started between decks to the lower Hold. As I passed the Main Hatch, Plumer raised the cover of the Hatch, and said come up here you son of a bitch, till I shoot you. Hall sung out come up and we wont hurt you, but only give you the length of this. At the time the men were called aft to work I heard them walking and supposed that they were all against me. I heard no one speak except Plumer, Cuttin & Hall. While the men were putting the fire out, I came aft and raised the corner of the after Hatch and went down into the lower hold. I crept aft to the mess; While I was at the mess they made the foremast hands go down between decks and break out the cask of Powder. They were afraid to go themselves, as I supposed. After I saw no hopes of shooting the Ring leader, I proceeded on to Mid ships of the ship on the starboard side. I supposed it was on the second day after, I was shot. I then raised my hands to God & asked him to protect my soul. I almost choked with thirst then I said "Oh God will thou be so kind as to give me a little water" As the ship rolled I heard a stick sliding on the cask about once a minute, & something told me there is water. I went there and found the Bung out & the cask nearly full of water. Then I said How will I get it out. I was in my drawers and had on a thick woolen shirt. Then I thought about taking a peice of my shirt collar and dipping in the water & suck it. I left the shirt collar at the cask when I went back to my place of stowing away. But when I went back I could not find it. I heard them shouting on deck and thought they were firing in the hold. I also thought I saw lights in search of me. I was frightened almost to death. As I crept further forward I lost my Bung Borer between the Main & F. Hatch. So I had nothing left but my Pistol, containing 9 [illegible] I found a cask of water and got a drink. I also found a cask of bread with the bung up. The bung being soft wood I rubbed a hole through it with the sight of my pistol, not dare to pound on it for fear of making them hear me. The [illegible] I lay. My feet had swelled on account of cold, so I tore a peice off my shirt tail & wrapped around my feet. I

ed to slip. I expected to be shot as soon as I came
so I thought I would stay there and die. I thought
I had been there 3 days. I thought I was getting along
well. I had torn another piece off my shirt collar by
which I could get water. I would get bread out of the
ring hole of the Bread cask. The collar I made fast in
my button hole for fear of losing it. The day they
found me. I asked them how long I had been
in the Hold, they told me five days. I thought it
had only been Three. While I was in the hold I
was as strong as a Lion but when I came on deck
could scarcely stand. While I was in the hold I could
hear a kind of suction in my shoulder. & I knew
then that I was badly hurt. It smelled very bad.
My shirt being bloody, cold & stiff I shifted it round
so put the soft side on the same shoulder the
same day I was found. When I got on deck I could
not stand. I looked so bad they had pity on me.
The foremast hands said that if there had been any-
other person with me they could not have told
who it was. I was so much altered. My hair stood
upright from fear of being shot. They took me aft
But Martha came up to me with a pistol cocked
and a hatchet raised, & struck me on the same shoul-
der with the Hatchet. & said I am going to shoot you
He then made motions with the Hatchet and said
I will cut your nose off, and kept striking near my
face. Plumer told him to keep still and not shot me.
But had hard work to hold him back. Plumer told me
I'd take them ashore where they wanted to go. I should not
be hurt, but might have the ship. & said you never mind
and me. & I shant shoot you. But my things were there so
soon as they made land they would kill me. My suffering
was indescribable. They took me forward to the forecastle and told me
that Mr Ford was all right. My heart was overjoyed, and said
I want let me see him. I was then sent aft and he
was kept forward in irons. They then made irons for me out
of iron hoop and made them so small that I could hardly
get them on. The irons were made of Heavy iron Hoop, & in the
shape of an ox bow, with an iron bolt running through and a
nut lock on the end instead of a key. I then asked them to put
them on my feet and not on my hands on account of my

shoulder. they then kept the irons off and let me free thinking I'd have a better chance to navigate the ship. Yours very Respectfully

Nelson Provost.
First Officer of the Ship
Junior of New Bedford

Monday Jan 4 1858

This morning between 9 & 10 A.M. the ten men aforesaid took two boats. loaded with stores & articles from out of the ship. & headed into the shore. at cape Howe. 20 miles off. from the ship. I then braced forward and made all sail. for New Zealand steering E.N.E. until after I got out of sight of the boats. then I changed my course to S. By W. for Hobart Town. V. Diemens land) at 11 AM.

Tuesday 5th 1858

First Part.} Strong northerly winds. steering S. by W. At 4 P.M. we spoke a brig. (Martha Ellen) of New Castle. and asked the Capt to come aboard. He did so and advised me to go to Sydney telling me I would not have northerly winds long. I gave him a written report of the whole transaction as far as I knew. He allowed my shoulder was almost mortal. & that I had better make all possible haste. for port. I then headed in to the land N.N.W. Middle Part} calm. Latter Part} light breze from the south. steering N by E. All sail set. Latitude 37° 05' S Lon 150° 09' E.

Wednesday 6th 1858.

1st Part. Light S.E. winds, steering N. By E. Middle Part Steering S.E winds steering N. by E. Latter Part. Light winds, men employed in bending the chain on the Anchors. All the iron & schackles were have on board by the Gang. & we bent the chain with cutting gear schackles No observation, Opposite Perpendicular Bluff bearing N.E. distance 20 miles from land at 12 M.

Thursday 7th 1858

First Part, winds from the North, Off Perpendicular point, Between 3 & 4 a steamer passed us steering North. Set the colors with the union down at half mast, We were answered by his setting his colors but he was not gentleman enough to come to my assistance. He must have seen us as we could see his colors with the naked eye.

Thursday 7 1858 Continued

I hope the U.S. will do the captains of that Steamer a favor
in the past. Light northerly winds flying off and on the land. At 7 A.M.
spoke a large merchantman. I did not know but he might
have a physician, and being wounded I inquired but she had none
Light Northerly winds. Latitude 35°.26'S. Longitude 151. E.

Friday 8 1858

First Part. Light Northerly winds. Did my best to get to the
Southward. Middle Part a light breeze spring from the S.E.
Made all sail. Steering N. by E. Latter Part. at 5 A.M. The
wind died away. at 7 A.M. a light breeze spring up from the
Northward. Latitude 34°20'S.

Saturday 9 1858

First Part. light northerly winds. Parted the Main T. Gallant yard
while Tacking ship. At 4 P.M. sent up a new one. Middle Part
Calm & Latter Part strong winds from the Northward
Latitude 34° 17. South

Sunday 10 1858

First part. Strong Northerly winds. Stirring clear & died away calm
